Academic Appointment

Koç University

Assistant Professor, Business Administration - Marketing

Jan 2026 – Present

Istanbul, Turkey

Education

Tilburg University

PhD in Econometrics

2019 – 2025

Tilburg, The Netherlands

Tilburg University

Research Master in Economics

2017 – 2019

Tilburg, The Netherlands

Bogazici University

BSc in Economics

2013 – 2017

Istanbul, Turkey

Research Areas

- Quantitative Marketing
- Empirical Industrial Organization
- Demand Estimation
- Consumer Search
- Simulation Assisted Estimation Methods

Work in Progress

Optimal Pricing and Product Returns (with [Bart Bronnenberg](#) and [Tobias Klein](#))

- We first document several empirical facts about product returns using a novel click-stream and transaction-level data set from a large e-commerce platform in Turkey. We then build and estimate an equilibrium model of the industry to derive the optimal pricing rule of firms, which takes into account the presence of product returns.

Estimation of Search and Return Costs in Online Markets

- I develop a consumer search model that incorporates product returns into online shopping behavior. I model how consumers form expectations from product pages and decide to keep or return items after purchase. I estimate the model using search and transaction data from a large e-commerce platform in Turkey. The results show how return policies influence consumer choices and offer insights to improve seller strategies.

Welfare Implications of Private Labels in Online Marketplaces under Consumer Search

- I examine how e-commerce platforms offering their own private labels impact market outcomes. I compare independent and dual-role platform structures using a consumer search model. My simulations show that private labels are promoted more, prices drop, platform profits rise, and third-party sellers lose out.

Teaching Experience

Koç University

Instructor for Data Driven Marketing MKTG350

2026 Spring

Istanbul, Turkey

Tilburg University

Teaching Assistant for Graduate Data Science Methods

2019 – 2022

Tilburg, The Netherlands

Tilburg University & Eindhoven Technical University

Teaching Assistant for Bachelor Data Science Methods

2019 – 2022

Tilburg, The Netherlands

Bogazici University

Teaching Assistant for Introduction to Microeconomics

2015

Istanbul, Turkey

Industry Experience

Tesla

Data Scientist

Sep 2023 – Nov 2025

Amsterdam, The Netherlands

- Developed demand estimation and forecasting models to support pricing and inventory decisions.
- Designed and implemented optimal pricing strategies to maximize revenue and balance regional inventory.
- Conducted data-driven depreciation analysis for residual value management.

TECHNICAL SKILLS

Languages: Python, Matlab, R, JavaScript, SQL

Tools: Git, Jenkins, Docker

Awards

Koopmans Scholarship

Merit-based scholarship during the Research Master.

2017 – 2019

Tilburg University

Distinguished Presidential Scholarship of Turkey

Awarded for ranking in the top 100 in the national university entrance exam.

2012 – 2017

The Republic of Turkey
